DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to an apparatus, classified in class 156, subclass 345.35.
- II. Claims 26-44, drawn to an apparatus, classified in class 156, subclass 345.35.
- III. Claims, drawn to a method, classified in class 134, subclass 1.1.
- IV. Claims 48-50, drawn to an apparatus, classified in class 156, subclass 345.35.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group III and Groups I, II and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatuses as claimed can be used to practice another and materially different process, such as CVD, etching or cleaning substrates, surface modification, etc.
3. Inventions of Group I, II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

Art Unit: 1746

808.01). In the instant case the different inventions they have different modes of operation, different functions, or different effects.

The invention of Group I requires a specific conductance. Groups II and IV do not require this.

The invention of Group II requires specific inject/exhaust system. Groups IV and I do not require this.

The invention of Group IV requires a compound valve. Groups II and I do not require this.

4. Because these inventions are distinct for the reasons given above and the search required for any of the Groups is not required for any other Group, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Michael J. Murphy on 9/23/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1746

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
